

## FRED Ultrafast Soft Recovery Diode 100A x 2 / 1200V

### FEATURES

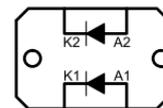

- Fast recovery time characteristic
- Electrically isolated base plate
- Large creepage distance between terminal
- Simplified mechanical designs, rapid assembly
- Compliant to RoHS
- Designed and for industrial level
- Planar passivated chips

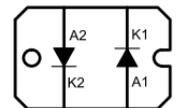

### DESCRIPTION

This SOT-227 modules with FRED rectifier are available in two basic configurations. They are the antiparallel and the parallel configurations. The antiparallel configuration NST200F12-A is used for simple series rectifier and high voltage application. The parallel configuration NST200F12 is used for simple parallel rectifier and high current application. The semiconductor in the SOT-227 package is isolated from the copper base plate, allowing for common heatsinks and compact assemblies to be built.
